***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/27/2006 has been entered.

***Allowable Subject Matter***

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance:

Closest prior art of record, namely Nelson, fails to disclose "loading a number of keys in a controller, the number set so that a device connected to the wireless network can miss being re-authenticated for a predetermined number of the time periods and still communicate in a secure manner on the wireless network ..." in combination with other claimed limitations and in light of the specification disclosed.

Nelson discloses that assuming the authentication, then the access point port associated with the client is unblocked to enable network based signal exchange using a client receive key and a client transmit key. When the session expires, either after a certain number of frames have been processed by the access point, or after a selectable period of time, the existing key pair is exchanged by a newly generated pair

of keys (i.e., wherein the new key pair are exchanged through re-authentication)(page 3, par. 22-23).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
